

- Ad dl 324 corresponds to an adenovirus provided with the abovementioned "deletions."

IN THE CLAIMS:

Please cancel claims 1 and 3 to 5 without prejudice or disclaimer of the subject matter contained therein.

Please amend the following claims:

6. (Twice Amended) An adenoviral vector comprising [a] nucleic acid [insert containing] sequences coding for several cytokines, or [containing] separate nucleic acid [inserts] sequences coding for different cytokines wherein said nucleic acid [inserts] sequences are placed[,] under the control of separate promoters of the rep gene of parvovirus H1.

7. (Twice Amended) A defective adenovirus[,] comprising the sequence according to claim [1] 14.

8. (Twice Amended) A cell culture infected with the adenoviral vector according to claim [1] 14.

[Please add the following new claims:]

--14. An adenoviral vector comprising a genomic sequence of an adenovirus, wherein said genomic sequence:
